Education

Quantum University

Master of Computer Applications (8.73 CGPA)

August 2021 – April 2023

Roorkee, India

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Internet Technology
- Web Development
- Software Methodology
- Database Management
- API Development
- Prompt Engineering

Experience

Keyideas Infotech Pvt. Ltd.

March 2023 – Present

Software Engineer (Backend)

Gurugram, India

- Delivered backend features across multiple client projects (WordPress/WooCommerce, PHP, Node.js) with a focus on reliability, maintainability, and performance.
- Collaborated with international stakeholders to translate requirements into technical solutions, align on scope/timelines, and ship iterative releases.
- Led R&D and rapid prototyping for new product ideas (spike investigations, proof-of-concepts), validating feasibility and implementing production-ready foundations using the latest tech stack.

Freelancer

August 2021 – January 2023

Full Stack Development

- Delivered end-to-end full-stack web solutions for multiple clients by gathering requirements, defining scope and timelines, implementing features (frontend + backend), and providing post-launch support and bug fixes.

Projects

Jewelry Ecommerce Websites | WordPress, WooCommerce, PHP

Keyideas Infotech Pvt. Ltd.

- Built and maintained WordPress/WooCommerce jewelry e-commerce sites using PHP, delivering custom product configuration (ring design) and storefront features.
- Implemented product catalog and diamond listing pages, including search and wishlist functionality to improve product discovery and user engagement.
- Troubleshoot and resolved production bugs, collaborating across multiple projects to keep releases stable and improve site performance.

Jewelry Virtual TryOn Service | JavaScript, NextJS

Keyideas Infotech Pvt. Ltd.

- Developed a web-based Virtual Try-On (VTO) experience using MediaPipe hand tracking and Three.js to render and position 3D jewelry models (rings, bracelets) on live camera and uploaded images.
- Implemented hand pose tracking, finger segmentation, and occlusion masking to support consistent ring alignment, depth/occlusion handling, multi-ring stacking, and palm-side visibility across mobile and desktop browsers.
- Improved runtime performance and usability via model preloading, adaptive scaling, touch/gesture controls (drag, pinch, zoom), and an image-based try-on fallback for iOS and lower-end devices.

Wordpress Plugins For Jewelry Website | PHP, MySQL, Javascript, Wordpress

Keyideas Infotech Pvt. Ltd.

- Developed internal WordPress plugins/tools (PHP, MySQL) to ingest, normalize, and sync 100k+ diamond SKUs from multiple vendors (API/feeds) into the WooCommerce catalog.
- Built a high-volume import pipeline (batching, validation, background jobs/cron, and DB indexing) to process hundreds of thousands of diamonds on a recurring schedule while keeping search/listing pages fast.
- Created an automation plugin that configures a jewelry site to sell diamonds end-to-end, including product attributes, pricing rules, filters, and a Build Your Own Ring flow (select setting + diamond) using the existing product catalog.

PromptVault - Prompt Management App (Personal Project) | Android, Kotlin, Jetpack Compose, AI Agents

- Built PromptVault to solve my own challenge of managing, refining, and reusing prompts while practicing prompt engineering.
- Developed the Android app end-to-end using modern app development practices, focusing on offline-first usage, clean architecture, and usability.
- Used the project as a learning platform to explore AI-agent style workflows, prompt templating, and systematic prompt experimentation.

Technical Skills

Languages: JavaScript (VanillaJS, Node.js), PHP, SQL, HTML/CSS, Java, Python

Tools: Linux, VS Code, Firebase, Postman, Git, GitHub, Docker, Dokploy, n8n, AI Agentic Development

Technologies/Frameworks: NextJS, WordPress, Laravel, MongoDB, PayloadCMS, StrapiCMS
